

Introduction to Adobe Lightroom

Course Outline

- Held over two days, 9:30 - 3:30.
- Includes a delicious, home made lunch on each day.
- The course is held at my home in Langley and is limited to six participants. You need a laptop computer (although some have brought their desktops) and a copy of Lightroom installed (Note: The course teaches Lightroom Classic CC and Lightroom 6 (standalone version) but does not cover the new, web-based Lightroom CC.
- Includes comprehensive electronic and printed notes on all the topics taught as well as email support with any LR issues you face after the course.

• Day One:

- Overview of Lightroom
- Library Module: Importing and exporting photos, managing files and folders, rating and culling.
- Develop Module: Using the tools of the Basic Panel to edit images.

Day Two:

- Review of Day One concepts. Extensive practice with editing photos.
- Using all of the tools in the Develop Module so you can:
 - get the exposure and tonal values of all images just right
 - convert to black and white
 - selectively adjust colours
 - make crooked buildings stand upright
 - sharpen images and remove digital noise
 - and so many more things

- Bonus: Although not included in the course, tutorials on the use of Slideshow and Book module are provided.
- Cost: \$225 +GST
- To register: email Dennis at dennis@doubleexposure.ca
